

Eclectic Methods Software Development

Vision Document

Development Team

Zachary Taylor
Patrick Davis

Goal/Vision

Provide a tool for pair programming and collaboration using live syncing of text, basic communication, and project file management.

Key Features

- Text Editing
- Live document synchronization between one or more users
- Independent text based communication
- Minimalistic file management system
- Syntactic Highlighting for at least one language

Constraints

- Server/P2p network management
- API Access/Legality of use
- Limited Time
